Medical Marihuana

In Michigan, the medical use of marihuana is regulated by the Michigan Medical Marihuana Act. The Act uses the spelling “marihuana” instead of marijuana. Any patient having a debilitating condition and his/her primary caregiver is permitted to possess, cultivate, manufacture, use, deliver, or transfer marihuana or paraphernalia to treat or improve the qualifying patient's debilitating medical condition. A qualifying patient is a patient who has been diagnosed by a physician as suffering from a debilitating condition. Additionally, to qualify for the use of medical marihuana, the qualifying patient and his/her primary care giver, should hold a registry identification card issued by the Michigan Department of Community Health.

The Act restricts use of medical marihuana under certain circumstances. Medical use of marihuana is permitted only if the use is in accordance with the state laws. The Medical Marihuana Act does not allow medical use of marihuana in school bus, school ground or any correctional centers. In Michigan, undertaking any task under the influence of marihuana constitutes negligence or professional malpractice. (uslegal.com)

% OF PATIENTS AFFLICTED WITH THE DEBILITATING CONDITION

* Other includes AIDS, Alzheimers, Amyotrophic Lateral Sclerosis, Cachexia, Crohn's Disease, Glaucoma, Hepatitis C, HIV, Nail Patella, Wasting Syndrome

**The total adds up to more than 100% because most patients are diagnosed with more than one debilitating condition.

The table above shows the percentage of all patients diagnosed with each condition.
